*Life in Earth's biosphere and across the Universe flourishes in processes that are sublime, not simple. Inspiring, transcendent, exalted, heavenly, wonderful, mystical ... not mundane. The interplay of organisms & icons, earthscapes & waterways, weather-patterns & sun-flares is indescribable by the divisive linear sciences of mathematical cause & effect ... all forms of grit & glory on this planet blend in mysterious ballets & harmonies, all minds & voices contribute, all eyes & ears are tuned to the numinous interplay of love and life ... (Rose, AL, 2024. Biosynergy & the Person-Centered Psychology of EcoSpiritual Well-Becoming.. Chapter 10 in J. Leonardi (Ed) Spirit, Environment and Personal Wellbeing; In-Press)*

**The Trajectory of Biosynergy on Earth.** Our planet's biosphere began in some secret seminal swamp where a swirl of silt merged into a miniscule amalgam of self-animation that, eons later, we humans named "Microbe." **In the Beginning: Becoming in Eden** began with a sacred **Merging in the Biosynergy of Conception** by the seeds and soils of **Original Love**. Every **Ontogeny in its Synergy of Mystery** was

revered, and **the Gestation & Birth of Innocence** in all organisms was honored. **All Becomings** – from ant to ape, plant to porpoise, bullfinch to baobab – were respected for their unique modes of **Growing Up Earthling**. From infancy and childhood to adulthood and old age, each sacred life on earth set about **Actualizing Innocence into Wonder** as the foundation for **Seeking & Answering One's Calling**. This personal yet universal process advances first by **Joining a Chorus of Harmonic Voices**, next through wandering & **Finding One's Voice in the Wilderness**, and ultimately by Transcending Earth in order to **Sing All, Love All, Become All** that flourishes in the Eternal Cosmic Synergy of the Universe.
